ASTHMA

Asthma is a common lung condition that causes occasional breathing difficulties.

It affects people of all ages and often starts in childhood, although it can also develop for the first time in adults.

There's currently no cure, but there are simple treatments that can help keep the symptoms under control so it does not have a big impact on your life.

3 ways to help manage your child's asthma well:

- 1. Have an asthma action plan** – follow this plan to help manage your child's asthma, it will help reduce their chances of having an asthma attack!
- 2. Set reminders for your preventer** – if prescribed, remember this needs to be taken everyday to control your child's asthma!
- 3. Keep your reliver inhaler with you at all times** – easy access is needed for an emergency!

Symptoms: Tight chest, Struggling to speak, Wheezing, Coughing, Lack of energy

Triggers: stress, cold air, food, medicines, exercise, smoking, dust mite, infections, pets, pollen, pollution

Remember your child needs a spacer with their inhaler!

Wellbeing for life

Can't walk the whole way?
Try to park in the blue zone where permitted and walk the rest of the trip.

Did you know?
Pollution levels are higher inside the car than outside.

If you need to drive – don't idle!
It's a waste of money and pollutes the air that we breathe!

Skip your ride, take a stride
