

Year 2 Spring Term

The young writers enjoyed creating descriptive and persuasive adverts enticing people to come and visit India, using comparative and superlative adjectives. After reading 'Priya, Dreams of Marigolds and Masala,' the children were eager to follow Babi Ba's roti recipe!

After learning about Holy week, the children visited the church. Reverend Rosy explained how Christians celebrate Easter and how they remember Jesus and the sacrifices he made. They enjoyed looking at the wonderful stain glassed windows, which helped them to visualise Jesus' last week on Earth.

During science week, the scientists in year 2 were excited to explore chromatography and create flowers. They were amazed when other colours started to appear even when they were not used. They enjoyed it so much, they used this method to create beautiful Mother's Day cards!

Eager to put their creativity to good use, the artists created wonderful collages using many techniques and inspiration from Romare Bearden.

Taj Mahal, Red Fort and the Lotus temple are just a few of many beautiful human features that can be found in India. The children enjoyed escaping the UK using Google Earth!
